Our customer's experiment of MPH Trailer 30XL and Bale Side Supports

---

Picture 1. MPH Trailer 30XL and Bale Side Supports.

MPH Trailer 30XL with bale side supports was delivered to a horse farm customer. The farm uses about 200 bales in a year and the farm host retrieves bales from another farm 40 km away.

There is a lot of other traffic on the route, e.g. heavy traffic due to the industry in the area. Our customer appreciates the safety in traffic brought by MPH Trailer 30XL with the bale side supports, because it is important for him to pay attention to others.

MPH Trailer 30XL is a multifunctional trailer that our customers fell in love with. He is able to move the farm's earthmoving machines, which is the normal use of the trailer. More accessories will also be available for the same trailer in the future – this accessory can also be delivered and assembled afterwards.

MPH Trailer 30XL is quite long – loading length of 9.7 m. Our customer wanted to lift the front and rear axles, because then the empty trailer can be turned in a small space. Agile feature in a long and sturdy product.

Kindly,
